

INVITATION MESSAGE

In the last 30 years, SPM techniques have revolutionized research and development in materials, furthering progress in nanotechnology and biology. This meeting is dedicated to the discussion of the latest developments in SPM techniques and their applications at the interface of physics, biology, materials sciences, chemistry, and engineering. At this meeting, the emphasis will be given on bio- and nano-technologies.

The symposium presents opportunities to listen and discuss novel developments and applications of SPM methods, providing a chapter to meet leading researchers during lectures and informal discussions from June 29 - July 2, 2014. Poster sessions and technical exhibition of leading AFM suppliers will also be arranged within the conference. Conference and exhibition will be held at Sogang University, Seoul.

I wish you participation of ISPM 2014 and meeting at Seoul.
